

## What people are saying about Oasis of Hope ...

*“Dr. Contreras holds the keys to adding years to your life and life to your years. He is on a leading edge of oncology and offers health to those who would hear his words.”*

**Dr. Robert A. Shuller, Crystal Cathedral Ministries**

*“At Oasis of Hope, I was part of the team helping to get me better as opposed to an object that a bunch of mechanics were working on.”*

**Donald Factor (son of international cosmetics company creator Max Factor)**

*“The term remission isn’t even used for me, it is called a cure ... It wasn’t like coming to a hospital, it was like walking in and sharing a good story with friends ... They made us feel like real people. That is the difference you will find here. You are treated like a person. You are treated with respect and love and it makes you grow.”*

**Bruce Northey, cancer survivor and director of Project Oasis of Hope, volunteer organization**

*“It is 19 years that I have been coming to Oasis ... I do not even know what is the best part of being here ... This is a holistic place. They don’t just treat the body, they treat the person, so everybody is in the same good spirits here – it is a great place to be.”*

**Burga Ratti, Oasis of Hope patient**

*“I am beating this disease, and it is a real horrific disease ... I think the biggest encouragement for people is to realize what a special place the Oasis hospital is. It is very special in my heart and I keep in constant contact with the hospital... It’s the only hospital I know of in the world where patients look forward to coming back.”*

**Kenneth Papini, cancer survivor**

*“When I first came into this place, it felt different and it didn’t feel like a hospital ... It felt like I was coming home.”*

**Rickie Deniz, cancer survivor**
